

Step-by-Step Guide

Monday, December 5, 2016 2:31 PM

<http://www.openswitch.net/documents/dev/step-by-step-guide>

- Follow the instructions in [Setting up a Linux machine for OpenSwitch Development](#) to install all the required packages before proceeding with <http://www.openswitch.net/documents/dev/linux-setup>

Install docker using below link.

<https://docs.docker.com/engine/installation/linux/>

<http://www.openswitch.net/documents/dev/step-by-step-guide#introduction-to-the-openswitch-build-system>

Tried the command **make configure as5712**

I see a warning that says "Host distribution ubuntu-16-04 has not been validated with this version of the build system"
